

TURTLE VAC

The ultra-light Turtle Vac is the most powerful and comfortable backpack canister vacuum on the market today. Weighing in at only 10 pounds, the vacuum easily straps on the back with ergonomically designed back support and harness for the ultimate in operator comfort. Or simply remove the harness and roll it along like a canister vacuum. It's powerful enough to tackle really tough jobs in record time, yet quiet enough to operate without disturbing the work flow. Hook up the optional powerbrush to provide the additional power of brush agitation for more thorough cleaning of high pile and traffic areas. Comes complete with choice of tool kit.
