

2400 Series Burnisher

*High Performance In
A Revolutionary,
Dust Control
Floor Burnisher.*

The 2400 Burnisher Series
reduces dust mopping using
PAMS[®], a unique Passive Air
Management System.

1500 RPM, 2400 RPM and Variable Speed
burnishers are available with or without the
Minuteman PAMS[®] Dust Control System.

Minuteman[®]

Revolutionary Minuteman Burnishers. Hard on Dust. Quick on Grime. Gives a "Wet Look" Shine to Floors.

A great benefit to building contractors, the 2400 PAMS® Burnisher is also exceptional for use in schools, offices, hotels and hospitals.

Available in 17" and 20" models, Minuteman's 2400 Series Burnishers are revolutionary because they reduce the need for dust mopping by using a Passive Air Management System (PAMS®) and they feature an ergonomically-shaped operator handle which reduces operator fatigue. In addition to comfort, the handle assembly ensures safety. It is double insulated with dual safety interlock switches and a power-on indicator light. Perfect for applications where quiet, uninterrupted burnishing is a must.

Controlled with ease by the operator, a systems alert center continuously monitors pad pressure,

carbon brush wear and circuit overload. The variable speed version of the 20" burnisher uses a rheostat to vary the speed of the pad.

Passive Air Management System (PAMS®).

Minuteman Burnishers are well known for their exclusive Passive Air Management System (PAMS®) that captures the natural air flow produced by the rotation of the pad and harnesses it to create a vacuum for dust control. Combined with a high efficiency filter used for fine filtration, these are the cleanest burnishers on the market.

SPECIFICATIONS

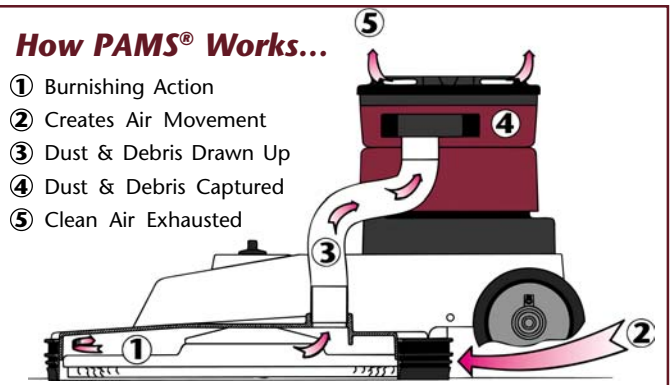

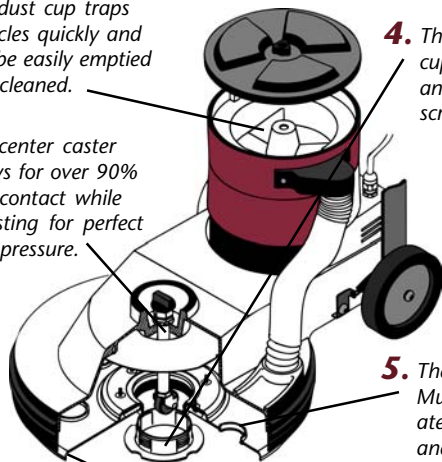

2400 Series Burnisher

	1500 rpm	2400 rpm	1500-2400 rpm
Brush Speed:	1500 rpm	2400 rpm	1500-2400 rpm
Brush Diameter:	17"/43cm or 20"/51cm	17"/43cm or 20"/51cm	20"/51cm

Five Patented Features Unique to Minuteman

1. The dust cup traps particles quickly and can be easily emptied and cleaned.
2. The center caster allows for over 90% pad contact while adjusting for perfect pad pressure.
3. The Multi-Flex® Pad Driver adjusts to the highs and lows of the floor while retarding pad growth.
4. The center pad locking cup safely secures the pad and can be snapped or screwed on with ease.
5. The venturi exciter in the Multi-Flex® Pad Driver creates 110 CFM to move dust and air through the filter.

Minuteman is a full line manufacturer of maintenance products including critical filter vacuums, industrial and commercial vacuums, sweepers, scrubbers, floor and carpet machines, PowerBoss® sweepers and scrubbers, Parker® Litter Vacs and Multi-Clean® chemicals for industrial, commercial, and institutional facilities.
