TRISODIUM NITRILOTRIACETATE 18662-53-8

May cause eye and skin irritation. Oral rat LD50 is 1450 mg/kg; dermal rabbit LD50 is > 10,000 mg/kg. Listed as a possible carcinogen by IARC and NTP. OSHA PEL and ACGIH TLV not available. Detergents containing Sodium Nitrilotriacetate are exempt from labeling under California Proposition 65 because exposure in detergent applications are significantly less than the "NO SIGNIFICANT RISK LEVEL" established by Cal-EPA for this compound. The Universities Associated for Research and Education in Pathology, Inc. determined that the cancer risk to man was so low 'one in ten million or less' as to be of no practical significance. Thus UAREP concluded that 'use of NTA in detergent products does not pose a practical risk to human health.'

**SECTION I (b): List of hazardous ingredients at >1.0%.****NAME** **CAS NO.****2-PROPANOL-1-BUTOXY** **5131-66-8**

May cause eye irritation and corneal injury. May cause skin irritation. Absorption of material may produce anesthetic or narcotic effects. Excessive inhalation may cause upper respiratory tract irritation and CNS effects. Overexposures may effect liver. Oral rat LD50 is 3300 mg/kg; dermal rabbit LD50 is 1400 mg/kg.
