

Ambassador[®]

*The Ambassador[®] & Ambassador[®] Jr.
Carpet Extractor*

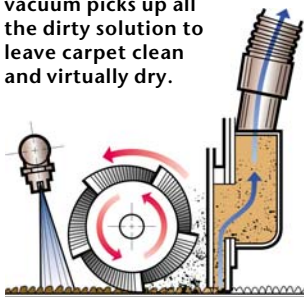

The Ambassador[®] Jr. offers quick and thorough cleanup for small applications.

The Ambassador[®] Self-Contained Carpet Extractor is the ideal choice for effective carpet and upholstery cleaning.

Minuteman[®]

Minuteman's Ambassador® Carpet Extractors are the ideal choice for effective carpet and upholstery cleaning.

Three spray jets force solution into carpet; independently powered brush deep cleans; and powerful vacuum picks up all the dirty solution to leave carpet clean and virtually dry.

These compact, durable carpet extractors can clean up to 2,500 square feet per hour. The units are constructed of noncorrosive polyethylene so they won't dent, corrode or rust. For effective operation, the Ambassador® is equipped with a stainless steel solution strainer which filters out damaging particulates before they reach the pump, plus an automatic float shut-off prevents damage to the vacuum motor.

All Ambassadors feature heavy-duty Viton™ seals which are impervious to the "new generation" chemicals available on the market today. The Ambassador features a removable recovery tank with a unique capped drain port which makes emptying easy and effortless.

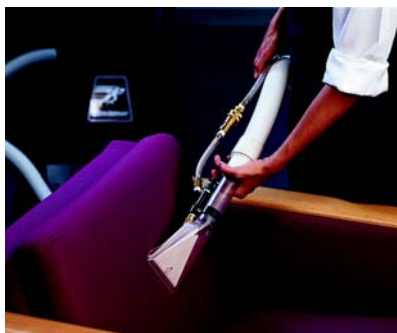

Three quick disconnect spray jets allow for simple maintenance and a helical brush design provides constant floor contact and better cleaning.

An operator-friendly control panel features independent switches to allow operator to individually control vacuum, brush, pump and accessory pump — plus a main power switch can turn on and off all functions simultaneously. The Ambassador is designed with an adjustable brush pressure control and a brush pressure gauge to assure proper brush setting.

The Ambassador can be used with optional accessory tools for cleaning upholstery, stairways, underneath furniture and against walls. Also, the Ambassador can be equipped with an optional 100 PSI pump.

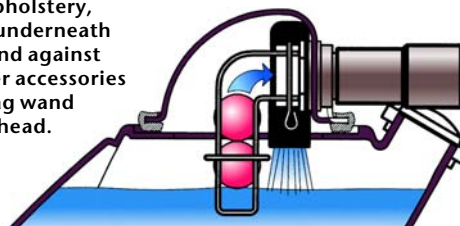

Removable recovery tank with convenient drain port saves time and makes for easy emptying.

The Ambassador can be used with an optional 15' or 25' hose and 4" upholstery tool for cleaning upholstery, stairways, underneath furniture and against walls. Other accessories include drag wand and powerhead.

When waste water tank is full, a water shut off system automatically stops the vacuum flow.
